INITIAL SITE ASSESSMENT

Golden Avenue Bridge Replacement Over Carbon Canyon Creek Placentia, California

Federal Project Number No. BRLS 5269 (025)
Bridge Number 55C-0192

Prepared for:

City of Placentia
401 E. Chapman Ave.
Placentia, CA 92870

Prepared by:

Cornerstone Technologies Inc.
Project No. 17001-E3649

February 2018

NOTICE AND ENVIRONMENTAL PROFESSIONAL STATEMENT

This report is designed to provide accurate and authoritative information with regard to the subject matter covered. However, it is provided with the understanding that the contents reflect Cornerstone's best judgment in light of the information available at the time of preparation and the fact that judgments about unknown future events are called for. Cornerstone does not make any warranty, expressed or implied, or assume any liability with respect to use of, or damage resulting from the use of any data, information, and/or projections contained herein. Certain information within this report may be interpreted to have legal implications. This report does not contain legal opinions. In the event that a legal opinion is required, Cornerstone suggests that services of competent environmental counsel be retained.

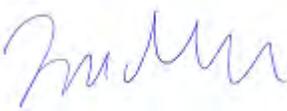

This report and its contents may not be shared, distributed, or copied for use by other companies, partnerships, or individuals without the express written authorization of Cornerstone.

We declare that, to the best of our professional knowledge and belief, we meet the definition of *Environmental Professional* as defined in §312.10 of 40 CFR 312, and we have the specific qualifications based on education, training, and experience to assess a property of nature, history, and setting of the subject site. We have developed and performed all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR 312 and ATSM E 1527-13.

Executive Summary

This executive summary provides the results of an Initial Site Assessment (ISA) conducted for properties associated within the project footprint area of the Golden Avenue Bridge (GAB) Replacement Project. The ISA involved evaluation of potential environmental contamination within the project footprint. The purpose of an ISA is to document the potential Recognized Environmental Concerns (RECs).

Project Description- Cornerstone Technologies Inc. (Cornerstone) was contracted by GPA Consulting (GPA) to perform an ISA for the City of Placentia who, in cooperation with CALTRANS, is preparing to replace the GAB (Local Bridge Number 55C-0192, Federal Project Number No.BRLS-5269 (025)) which spans Carbon Canyon Creek in the City of Placentia, California. The GAB is an earth-filled reinforced concrete arch bridge with two (2) traffic lanes.

Identified RECs – An REC is the presence or likely presence of any hazardous substances or petroleum products in, on or at a property:

1. Due to a release to the environment;
2. Under conditions indicative of a release to the environment; or
3. Under conditions that pose a material threat of a future release

There are five (5) RECs regarding the GAB: First, there is one (1) active oil well and two (2) plugged wells adjacent to the GAB and within the project footprint. Second, according to Orange County Health Care Agency, Environmental Health Division, there is currently an open industrial cleanup case (Case ID #17IC001) that is listed for “Former Plegel Oil Facility” at 1049 Golden Ave. Third, the age of the bridge suggests materials used at the time of construction may have asbestos containing materials (ACMs) and/or lead based paint (LBP) within the structure or the associated utilities. Fourth, there may be the possibility of Aerially Deposited Lead (ADL) in adjacent soils. And finally, the area surrounding the GAB was historically used for agricultural purposes. There is a potential for pesticides in the soil. **These RECs will affect the project. Please see Section 6.0 Conclusions and Recommendations.**

Historical Recognized Environmental Concerns (HRECs) – A HREC is a past release of hazardous substances or petroleum products where remedial measures allow for unrestricted use of the property, without the use of any controls. No HRECs were identified.

Controlled Recognized Environmental Condition (CRECs) - A CREC is a past release where contamination remains in place and property use is contingent on institutional controls. Although there’s an ongoing industrial cleanup at the Former Plegel Oil Facility, there are no known environmental liens or institutional control in place for that property that will affect the GAB replacement project.

Cornerstone recommends performance of the following supplementary activities to evaluate the presence/extent of RECs before or during development and implementation of the GAB project:

Develop a work plan for asbestos survey and sampling following California Code of Regulations Title 8, Section 1529, Article 4, Asbestos - Dusts, Fumes, Mists, Vapors and Gases prior to bridge removal or renovation.

Develop a work plan for LBP survey and sampling following California Code of Regulations Title 8, Section 1532.1, lead prior to bridge removal or renovation.

The removal of traffic striping and pavement marking residue must be managed following a standardized lead compliance plan (LCP) and work plan (WP) prepared by a Certified Industrial Hygienist (CIH) to address the health and safety of workers performing the task. SSP 14-11.07 must be used whenever the project will include separate removal of yellow paint or yellow thermoplastic paint when the residue will be a hazardous waste (total lead equal to or greater than 1,000 mg/kg and soluble lead equal to or greater than 5 mg/l). If unsure, assume the paint residue will be a hazardous waste and use SSP 14-11.07. If you are sure (as a result of testing or complete painting records) that the yellow paint or yellow thermoplastic paint residue will be a non-hazardous waste, or if colors other than yellow are being removed, use SSP 15-2.02C(2) which only requires a lead compliance plan.

All utilities and transformers in the immediate surroundings should be identified/tested for possible pcbs prior to relocation and or disposal. Furthermore, a Dig-Alert should be filed to determine the location of all underground utilities prior to the start of any construction activity.

Phase II field sampling to evaluate the potential for ADL, pesticide, and Total Recoverable Hydrocarbons (TPH) in the exposed ground soil area within the project footprint area.

The following are considered to be *de minimis* environmental conditions:

- Scattered municipal trash/waste was observed along with concrete lined channel underneath and adjacent to the bridge. Although the waste is considered a *de minimis* environmental condition, project managers must follow Caltrans Unknown Hazards Procedures prior to any construction activity.

1.0 Introduction

1.1 Purpose and Organization of Report

1.1.1 Purpose

The purpose of this study is to:

- I) Review past and present land uses for indications of manufacture, generation, use, storage, transportation and/or disposal of hazardous wastes at the site;
- II) Review past and current land uses of the properties in the vicinity of the site, including adjacent properties, for indications of the manufacture, generation, use, storage and/or disposal of hazardous substances or hazardous wastes;
- III) Evaluate the potential for site soil and/or groundwater contamination due to the presence or potential presence of hazardous substances or hazardous wastes resulting from [a] any past and present site land use activities and [b] any past or present land use activities of properties in the vicinity of the site, including adjacent properties;
- IV) Evaluate the potential for the existence of environmentally-sensitive areas on the site; and
- V) Render findings and professional opinions regarding both the potential for environmental contamination due to the presence or potential presence of hazardous substances or hazardous wastes at the site and the existence of environmentally-sensitive areas.

1.1.2 Scope and Project Description

The scope of this investigation included an observation of the project site, a review of the site history, review of available regulatory records and an environmental assessment of the property. The information used in the assembling of this ESA was accumulated during the review of aerial photographs; and a review of federal, state and local regulatory agency records, maps and publications. All contents of this report have been prepared in accordance with ASTM 1527-13. The scope of this inspection is limited to the GAB.

Cornerstone was requested to perform an ISA for the City of Placentia who, in cooperation with CALTRANS, is preparing to replace the GAB. The GAB is proposed to be widened to eighty (80') feet with a single span of approximately seventy-five (75') feet, and will consist of four (4) 12' lanes, two (2) 5' shoulders/bike lanes, and two (2) 8' foot sidewalks.

1.2 Disclaimer

This report is designed to provide accurate and authoritative information with regard to the subject matter covered. This report is provided with the understanding that the contents reflect Cornerstone's best judgment, in light of the information available at the time of preparation, and the fact that judgments about unknown future events are called for.

Cornerstone does not make any warranty, express or implied, or assume any liability with respect to use of, or damage resulting from the use of any data, information, and/or projections contained herein. Certain information within this report may be interpreted to have legal implications. This report does not contain legal opinions. In the event that a legal opinion is required, Cornerstone suggests that services of competent environmental counsel be retained.

1.3 Limiting Conditions

Cornerstone had requested file reviews at the Orange County Fire Department - Public Records Department, Southern California Air Quality Management District (AQMD), Department of Toxic Substance Control (DTSC) – Cypress office, California Regional Water Quality Control Board (RWQCB) – Santa Ana Region, and City of Placentia-Public Record Request. Please see Section 4.7 and Appendix D Records of Communications for all regulatory comments. Cornerstone's ISA was limited to; review of readily available and relevant data from EDR and regulatory agencies; site walk conducted on May 4, 2017, and statements made and information provided by the client, their agents, outside parties, and regulatory agencies.

1.4 Limitations of the Assessment

The ISA was prepared in accordance with the Scope of Work described in Section 1.1.2 and follows all ASTM requirements. No other services beyond those explicitly stated should be inferred or are implied.

The ISA is a limited and non-exhaustive survey that is intended to evaluate whether readily available information indicates that the historic or current use of the subject property resulted in contamination by hazardous substances or waste. As a result, without a comprehensive sampling and analysis program or implementation of services beyond the original scope of work, certain potential conditions, including, but not limited to those summarized below, may not be revealed:

- Naturally occurring toxic substances or elements found in the subsurface soils, rocks, or water including methane.
- Mold, fungi, bacterium or other microbial contaminants.

- Toxic substances commonly found in current habitable environments, such as stored household products, building materials, and consumables.
- Biological or infectious agents and pathogens.
- Contaminant plumes (liquid or gaseous) below the surface from a remote or unknown source.
- Unknown, unreported, and not readily visible site contamination that may have been caused by "midnight" dumping and/or accidental spillage.

Cornerstone's ISA was limited to; review of readily available and relevant data; and statements made and information provided by the client, their agents, outside parties, and regulatory agencies.

Cornerstone has exercised due diligence and customary care in the conduct of this ISA but has not independently verified information provided by others. Therefore, Cornerstone assumes no liability for any loss resulting from errors or omissions arising from the use of inaccurate/incomplete information or misrepresentations made by others.

This ISA has been prepared at the request of the City of Placentia and it should be emphasized that because conditions at the subject property can change over time, the use of this report by unauthorized third parties shall be at their own risk.

2.0 Site Description

2.1 Site Location and Description

The GAB is located in a residential area of Placentia approximately 0.4 miles west of Imperial Highway (State Route 90). The GAB spans over Carbon Canyon Channel, a concrete flood channel, which is lined with trees and houses on all sides.

2.1.1 Adjoining Properties Description

To the northeast of the GAB project site, there is currently an empty lot that formerly had two (2) oil wells producing. The wells are now plugged (capped) but the lot remains vacant. To the southwest, there's an adjacent small lot that currently houses three (3) potentially abandoned silos. It's confirmed that there is one (1) active oil well on this lot. There is residential housing to the northwest and southeast of the project site. Please see Section 4.7 Regulatory Agency Review, Division of Oil, Gas and Geothermal Resources, for inactive/active oil wells information.

2.1.2 Type of Property

The GAB was built in 1934 and is an earth-filled reinforced concrete arch bridge supported on spread footings. The bridge is thirty-four (34) feet long and twenty-seven (27) feet wide and carries two (2) traffic lanes over the Carbon Canyon Channel. The bridge cross section consists of two (2) 1'-6" wide concrete railings and two (2) 12'-0" wide traffic lanes.

The GAB is classified as a secondary arterial highway and described as follows:

Golden Avenue at Carbon Channel (Bridge No. 55C-0192) – BRL 5269 (025)

Year Built:	1934
Feature Crossed:	Carbon Creek Channel
Structure Type:	Single-Span Earth Filled Reinforced Concrete Arch
Length (BB-EB):	Forty-Seven (47') feet
Width (Out-Out):	Twenty-Eight (28') feet
Curb to Curb:	Twenty-Four (24') feet

2.1.3 Improvements on the Property

The GAB is proposed to be widened to eighty (80') feet with a single span of approximately seventy-five (75') feet, and will consist of four (4) 12' lanes, two (2) 5' shoulders/bike lanes, and two (2) 8' foot sidewalks.

2.2 Topography

The GAB is situated at approximately three-hundred and fifty two (352') feet above mean sea level (asml) with the topography of the site generally sloping to the southwest. The topography of the area is typical of most Californian mountain-backed ancient sea terraces. Mountains that border the terraces to the east provide a source of sediment which is deposited proximate to the mountains. Over time, this sediment is transported to the sea, leaving the terrace gradually inclined toward the mountains. Placentia is located only 3.5 miles from these mountains and resides at an elevation of approximately 260 feet. Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites may be impacted. The topography has been determined from United States Geological Services (USGS).

2.3 Soils

Based on the Soil Conservation Service STATSGO data, the following additional subordinate soil types may appear within the general area of the target property:

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Permeability Rate (in/hr.)	Soil Reaction pH
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	5 inches	sand	Granular materials	Silty clay materials	Max: 141 Min: 42	Max: Min:
2	5 inches	59 inches	Stratified coarse sand to sandy loam	Granular materials	Silty clay materials	Max: 141 Min: 42	Max: Min:

2.4 Geology

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contamination migration may be occurring. Placentia, like most of Orange County, has granular sandy soil with high water content. Areas with these conditions may experience liquefaction during extreme ground shaking.

According to the Department of Conservation, Division of Mines and Geology, six faults are located within close proximity to Placentia. These include the Whittier-Elsinore, Norwalk, Newport Inglewood, Sierra Madre, Palos Verdes and San Gabriel faults. The San Andreas and San Jacinto faults are located some distance from Placentia, but have the potential to deliver larger magnitude earthquakes. The closest fault to Placentia is the Whittier-Elsinore, approximately 1,000 feet north of Placentia. There are no identified Alquist-Priolo Earthquake Fault Zones within the City limits.

Rock Stratigraphic Unit

Era: Cenozoic
System: Tertiary
Series: Pliocene

Geologic Age Identification

Category: Stratified Sequence

Code: TP

Information pertaining to site was found on the EDR Report dated March 2017 as well as Geotracker.

2.5 Hydrology

The Carbon Canyon Watershed, which is approximately 5,918 hectares, is divided into two (2) areas: the upstream area that is part of the Carbon Canyon Dam watershed, and the downstream area that is a tributary to the concrete channel. The channel overlies the Orange County Groundwater Basin (With a surface area of approximately 224,000 acres ((350 square miles))). Recharge to the Basin is generally from the Santa Ana River, precipitation, and injection via wells along the Talbert Barrier, a seawater intrusion barrier. Most of the recharge for the Basin occurs in the forebay, located along the eastern margin of the basin, which is characterized by highly permeable sands and gravels with few discontinuous clay and silt deposits allowing direct percolation of Santa Ana River and other surface water. The City of Placentia is within the 500-year flood zone. Therefore, large scale flooding within the City is highly unlikely.

Geotracker was researched for previously obtained groundwater data. Information pertaining to site was found on the California Regional Water Quality Control Board, Santa Ana Region and Geotracker websites..

2.6 Groundwater

Groundwater flow direction information can be used in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target properties, what downgradient sites might be impacted. Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

According to groundwater well data obtained from the California Department of Water Resources, State Groundwater Information Center, the groundwater flow direction is to the southwest. State water well located approximately 1.6 miles from the GAB has a historical below depth ground surface (bdgs) of 56.15 feet (State Well #338949N1178365W001).

3.0 Site History

3.1 Title Records Review

Cornerstone did not receive any title or property records for the GAB. The federal project number is BRLS-5269 (025) and the local bridge number is 55C-0192.

3.1.1 Environmental Liens or Activities or Use Limitations

Cornerstone is unaware of any current environmental liens or property use limitations as of May 2017.

3.2 Current Ownership

3.2.1 Current Occupant (s) Information

There is no occupant information.

3.3 Historical Aerial Photographs

Aerial photographs were reviewed from Environmental Data Resources, covering the years 1938, 1946, 1952, 1963, 1972, 1977, 1985, 1989, 1995, 2005, 2009, 2010, and 2012. The aerial photographs reviewed were taken at high altitudes and all observations are subject to interpretation. A summary of the details identified in each photographic map is as follows:

Aerial Photograph 1938: The GAB is present and spans over Carbon Canyon Creek. The creek is unlined. The quadrants surrounding the bridge are used for agricultural purposes.

Aerial Photograph 1946: The site appears to be relatively unchanged from the previous photograph.

Aerial Photograph 1952: The site surrounding the GAB appears to be relatively unchanged, however to the north of Imperial Highway there is now an industrial park.

Aerial Photograph 1963: Although the quadrants surrounding the GAB have remained unchanged, housing to the west and northeast of the bridge.

Aerial Photograph 1972: There is housing to the west and south of the GAB. Portions to the east remain undeveloped however it is no longer being used for agricultural purposes.

Aerial Photograph 1977: There is now housing directly to the southeast of the GAB. The rest of the quadrants remain unchanged.

Aerial Photograph 1985: There is now an oil operation in the northeast quadrant of the GAB. The rest of the quadrants remain unchanged.

Aerial Photograph 1989: The site appears to have remained the same as the previous photograph.

Aerial Photograph 1995: The site shows the target property's present day conditions with bordering buildings and farmland.

Aerial Photograph 2005: The site appears to have remained the same as the previous photograph.

Aerial Photograph 2009: The site appears to have remained the same as the previous photograph.

Aerial Photograph 2010: The site appears to have remained the same as the previous photograph.

Aerial Photograph 2012: The site appears to have remained the same as the previous photograph.

3.3 Historical Topographic Map

Historical Topographic Maps are designed to assist professionals in evaluating potential liability on a target property resulting from past activities. A review of the USGS historical topographic map reveals that the area surrounding the GAB has historically been used for agricultural purposes until it became developed with housing. A review of the historical topographic map can be viewed in Appendix B-Site Photographs.

3.4 Historical Document Review

Historic map coverage was requested from the EDR Historic Map Collection; EDR has the largest and most extensive private collection of prior-use maps in the United States. The EDR collection includes Historical Maps from the following publishers: Teledyne, NAIP, DOQQ, USGS maps and EDR.

In the Certified Sanborn Map Report search, the report certified that the complete holdings of Sanborn Library, LLC collection have been searched based on client supplied target property information, and Sanborn Fire Insurance Maps covering the target property were not found.

3.5 Interviews

As of May 2017, Cornerstone has not conducted any interviews regarding the GAB replacement project.

4.0 Regulatory Records Review

4.1 Regulatory Database Records

Cornerstone contracted with EDR to perform a regulatory database search for this assessment and properties in the vicinity of the project site. The database report meets government records search records requirements of ASTM Standard Practice for Environmental Initial Site Assessments, ASTM E 1527-13. The information presented in the EDR report represents a compendium of data from numerous federal, state, regional, local and private industry database sources. Refer to the introductory text of the EDR report for more detailed descriptions of the database sources searched.

EDR geographically analyzed the data and plotted it on several maps utilizing the address information provided by the databases. That address information was geocoded (assigned latitude and longitude coordinates) utilizing mapping information provided in the US Government Tiger Files. All the locations listed in the EDR report are known sites of environmental interest, but not all are necessarily sites of current environmental contamination. The listed sites are subject to federal, state and local environmental laws and may be considered as potentially having some environmental impact on the property. However, the criteria for listing are that the site is subject to regulation, and, listing does not always mean that a release of a material has occurred.

Search distances are per ASTM standard unless otherwise stated. Refer to Appendix C- Regulatory Database for the actual database printout and associated maps showing documented hazardous sites within the ASTM E 1527-13 search radius of this ISA.

No. of sites identified in Federal Databases at Target Property (TP):	0
No. of sites identified in State Databases at TP:	0
No. of sites identified in Additional Databases at TP:	5

1049 Golden Avenue is the location that is identified in the five (5) additional regulatory databases.

4.3 Zoning/Land Use Records

4.3.1 City Directory

City Directories have been published for cities and towns across the US since the 1700s. Originally a list of residents, the city directory developed into a sophisticated tool for locating individuals and businesses in a particular urban or suburban area.

Twentieth century directories are generally divided into three sections: a business index, a list of resident names, addresses, and a street index. City Directory can be viewed in Appendix E- Reference Documents.

4.4 Local and State Trial Court Records

Cornerstone was unable to locate any local or state trial records for the project site.

4.5 Historical/Archaeological Records

No historical or archaeological records were found for the project site.

4.6 City Engineering Plans

Cornerstone was unable to acquire city engineering plans from the City of Placentia regarding the replacement of the GAB. Please see Appendix D for all agency records of communication.

4.7 Regulatory Agency Review

Cornerstone has requested file reviews with the Orange County Fire Department - Public Records Department, Southern California Air Quality Management District (AQMD), Department of Toxic Substance Control (DTSC) – Chatsworth office, California Regional Water Quality Control Board (RWQCB) – Santa Ana Region, and City of Placentia-Public Record Request. Records of agency communications can be found in Appendix D. Agency files reviewed can be viewed in Appendix E.

California Regional Water Quality Control Board (RWQCB)-Santa Ana Region: The file review at the RWQCB has been requested for the subject site. Cornerstone will review and update any relevant data.

Department of Toxic Substance Control (DTSC): The file review at the DTSC has been requested for the subject site. DTSC responded to Cornerstone’s request and determined no applicable files were found.

South Coast Air Quality Management District (AQMD): The file review at ADMD has been requested for the site. Cornerstone will review and update any relevant data.

Orange County Fire Department, Public Record Request: The file review at the Orange County Fire Dept., Public Health has been requested for the subject site. Cornerstone will review and update any relevant data.

City of Placentia, - Public Record Request: The file review at the City of Placentia, Building and Safety Department has been requested for the project site. Cornerstone will review and update any relevant data.

Department of Toxic Substances Control (DTSC) - Envirostor: No cases were found at the subject site.

Division of Oil, Gas and Geothermal Resources (DOGGR): No oil or gas wells are present at the subject site. However, in the southwest quadrant adjacent to the GAB, there is one (1) active oil well. All of the listed wells are plugged and non-operational can be viewed in Appendix E Reference Documents.

Operator	Well Status	API #	Location	Operation Date	Abandoned Date	Production Data	Depth
Imperial Oil Co.	Plugged, abandoned	05905007	NE of GAB	N/A	N/A	N/A	N/A
Jones Imperial #2, LLC	Plugged, abandoned	05905009	NE of GAB	1979-2016	4-1-2016	(1-1-16 thru 4-1-16) Oil: 338 bbl Water: 12,518 Gas: 30 Mcf	N/A
Coyote Oil LLC	Active	05900303	SW of GAB	1979-present	N/A	(1-1-17 thru 12-1-17) Oil: 104 bbl Water: 0 bbl Gas: 0 Mcf	N/A

Regional Water Quality Control Board (RWQCB) - Geotracker: No cases were found at the subject site.

Pipeline and Hazardous Materials Safety Administration: No gas transmission pipelines were found near the GAB.

5.0 Site Reconnaissance and Review of Hazards

5.1 Site Reconnaissance Objective

The objective of the site reconnaissance is to collect information regarding RECs in connection with the GAB.

5.2 Methodology and Limitations

Each separate property possesses unique physical and environmental characteristics, and thus the methodology for every site reconnaissance must be uniquely adapted to suit those characteristics.

This section of the report includes observations made during the site reconnaissance of the property that pertain to its unique areas of environmental interest. There were no limitations encountered during this inspection.

5.3 Observations

5.3.1 Exterior Setting

The GAB is located in a residential area of Placentia approximately 0.4 miles west of Imperial Highway (State Route 90). The GAB spans over Carbon Canyon Channel, a concrete flood channel, which is lined with trees and houses on all sides. Cornerstone accessed the site on May 4th, 2017.

5.3.2 Interior Setting

There are no buildings at the project site.

5.3.3 Site Reconnaissance Checklist

The following indicators of potential hazardous/contamination sources were observed directly within the project area during the site reconnaissance:

- Indicators of septic tanks or pesticide pots;
- Groundwater monitoring or sampling wells;
- Soil stockpiles;
- Liquid-filled surface impoundments;
- Hazardous material storage structures;
- Wastewater pipes or outfalls;
- Nuisance odors, fumes or dark plumes; or
- Stressed vegetation.
- Trash or unknown waste

5.4 Chemicals and Raw Materials

As of May 2017, no identifiable chemical or raw materials have been stored or disposed of at the GAB.

5.5 PCBs

Polychlorinated Biphenyls, or PCBs, are a major type of toxic chemical regulated by the Toxic Substance Control Act (TSCA). PCBs are most commonly found in electrical transformers and capacitors, air conditioning equipment and lighting ballasts. PCB liquids have been used as coolants, lubricants and hydraulic fluids in such equipment as electrical transformers, fluorescent light ballasts, electrical panels, large compressor, internal combustion engine crankcases and hydraulic elevator lift equipment. In May of 1979, Federal regulations prohibited the use of PCB dielectric fluids in the manufacture or service of the above, described equipment.

The body of regulations governing this issue is known as the Toxic Substance Control Act (TSCA), Section 761 of the 40 CFR (Code of Federal Regulations). All light fixture ballasts are considered to contain PCBs unless they are specifically marked "NON-PCB". Southern California Edison confirmed that all PCB contaminated transformers have been removed. No PCB's are on-site.

5.6 Asbestos-Containing Materials

A preliminary survey for Asbestos Containing Building Materials (ACMs) was not included as a part of the original scope of work.

The distribution of a wide variety of ACMs, particularly during the mid-1970s, resulted in asbestos being present in some of the roofing, caulking/putties, adhesives, sparking compounds, insulation and/or non-accessible building materials in structures erected during this time. Sampling of these types of materials may require techniques that would be destructive to subject facilities and in the case of roofing materials may void warranties. However, without a comprehensive survey being completed, Cornerstone is unable to comment on the presence of ACMs at the site. It is recommended that all such possible asbestos-containing materials be tested prior to any future repairs, renovation or demolition activities that would disturb these materials. Any future testing, removal, or disturbance of ACMs should be handled in compliance with federal, state and local regulations. Licensed, qualified asbestos abatement personnel should be retained prior to any demolition or renovation of subject facilities. Please see section 6.0 Conclusions and Recommendations.

5.7 Radon

State Database: CA Radon

Radon Test Results:

<u>Zipcode</u>	<u>Num Tests</u>	<u>>4 pCi/L</u>
91324	65	10

The Federal Radon Zone for Orange County is 2

Note: Zone 1 indoor average level > 4 pCi/L
 Zone 2 indoor average level >= 2 pCi/L and <= 4 pCi/L
 Zone 3 indoor average levels < 2 pCi/L

Federal Area Radon Information for Orange County, CA

Number of sites tested: 9

<u>Area</u>	<u>Average Activity</u>	<u>% <4 pCi/L</u>	<u>% <4-20pCi/L</u>	<u>% > 20 pCi/L</u>
Living Area – 1 st Floor	2.000 pCi/L	100%	0%	0%
Living Area - 2 nd Floor	Not Reported	Not Reported	Not Reported	Not Reported
Basement	Not Reported	Not Reported	Not Reported	Not Reported

5.8 Lead in Drinking Water

No sampling for lead in drinking water was conducted during the investigation of this project site. Lead was used in piping and may still be detected in the pipe soldering. Invasive sampling is not part of the ASTM Scope of Work for ISAs.

5.9 Division of Oil and Gas Wildcat Maps

According to EDR's database report, oil/gas wells were found within 1/8 mile search radius of the project site and are listed in Appendix C- Regulatory Documents. Additionally multiple historical oil/gas wells were reported to be located on the project site or within close proximity of the project site.

5.10 Landfills

According to EDR's database report, there are no landfill designations associated with the GAB or surrounding sites within the ASTM 1527-13 search radius of the site.

5.11 Pits, Sumps, Drywells and Catch Basins

Cornerstone did not identify any pits, sumps, drywalls and catch basins located at the GAB.

5.12 On-Site Underground Storage Tanks (UST)

No USTs are onsite or were identified in any federal/state database.

5.13 On-site Aboveground Storage Tanks (AST)

There are three (3) ASTs that were identified during the site reconnaissance. They are located in the southwest of the GAB in the adjacent Coyote Lot. This will not affect the project.

5.14 Storm Water Drainage

All surface runoff in the area will ultimately be directed from the GAB southwest into the Santa Ana River, where it will combine with other effluences and flow towards the Pacific Ocean.

5.15 Flood Zone Information

According to EDR's Database Report, the project site is not located within a 100 to 500-year flood zone. The following information was attained from the EDR report.

Flood Plain Panel at Target Property: 06037C1900F-FEMA DFIRM Flood data
Additional Panels in search Area: Not Reported

5.16 Wetlands Information

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property: YORBA LINDA

NWI Electronic Data Coverage: Yes. (Please refer to Overview Map and Detail Map)

5.17 Overhead Power Lines

Overhead power lines run parallel on the north side of Golden Avenue. Two (2) telephone/cable utility boxes were identified as well. Please see Section 6.0 Conclusions and Recommendations.

5.18 Vapor Encroachment Screening

“The presence or likely presence of vapors in the sub-surface of the target property caused by the release of vapors from contaminated soil or groundwater either on or near the target property.” According to the Vapor Intrusion Screening Report generated by EDR, the findings show no areas of concern located within 0.333 mi of the target property. The purpose for conducting a vapor encroachment screen (VES) on a property parcel is that contaminants of concern (COC) may migrate as vapors into the vadose zone of a property as a result of contaminated soil and/or groundwater on or near the property.

5.19 Aerially Deposited Lead (ADL)

Due to the historical use of motor vehicle fuels (MVF) containing lead; property adjacent to historical thoroughfares typically contain concentrations of lead that have been historically aerially deposited.

The Department of Toxic Substances (DTSC) as agreed to provide oversight of the activities conducted by Caltrans related to soils containing elevated concentrations of aerially deposited lead from car exhaust in State owned highway rights-of-way. Caltrans shall conduct the activities in the manner specified herein. All work, as appropriate, shall be performed consistent with Health and Safety Code, section 25100et seq., as amended; the National Contingency Plan (40 Code of Federal Regulations (CFR)) Part 300, as amended; DTSC and U.S. EPA RCRA and Superfund guidance documents regarding site investigation and soil management. Please see Section 6.0 Conclusions and Recommendations.

6.0 Conclusions & Recommendations

CONCLUSIONS

The scope of this inspection is limited to the GAB, located approximately at 1049 Golden Avenue in Placentia, CA. Based upon Cornerstone's review of the environmental conditions at the center; the following conclusions and recommendations are made:

- 1) Cornerstone requested file reviews with the DTSC, AQMD, City of Placentia-Public Records Request, Orange County-Fire Department, and the Regional Water Quality Control Board (Santa Ana). Cornerstone has completed file review requests at each agency. All of the above mentioned file reviews were granted and we are currently awaiting responses from all agencies. Records of communications can be found in Appendix D.
- 2) Hazardous Waste Database Review: Cornerstone conducted a general search of available hazardous waste projects documents and reviewed the Santa Ana Regional Water Quality Control Board (RWQCB, Geotracker), Department of Toxic Substances Control (DTSC, Envirostor), National Pipeline Mapping System (NPMS) and Division of Oil, Gas and Geothermal Resources (DOGGR). Please see Appendix E.
- 3) Due to the presence of one (1) active oil well located at the Coyote lot in the southwest quadrant, and the two (2) plugged oil wells of the Plegel lot in the northeast quadrant, there's a potential for soil and groundwater contamination. Additionally, 1049 Golden Avenue was identified in the Orange County Industrial Site database as a petroleum spill site. Although the site obtained closure certification, no other records have been found nor confirm the extent of the cleanup.
- 4) It is suggested that the GAB may have been constructed during a time when ACMs or LBP may have been utilized during the construction. (ISAs do not typically include ACM surveys) Cornerstone did not receive any information regarding the absence of ACMs or LBP. Additionally, the traffic striping on Golden Avenue may contain LBP. Please see Recommendations.
- 5) Overhead power lines were identified near the project site; additionally utility poles and transformers were observed within the immediate surroundings. A Dig-Alert should be filed to determine the location of all underground utilities prior to the start of any construction activity.
- 6) Trash and refuse were identified during the site walk littering the project site area. (Unknown if hazardous or non-hazardous) Must follow Caltrans Unknown Hazards Procedures prior to any construction activity.

- 7) Due to the historical use of motor vehicle fuels (MVF) containing lead, properties adjacent to historical thoroughfares typically contain concentrations of lead that have been historically aerially deposited. Phase II investigation recommended.
- 8) Due to historical agricultural activities surrounding the GAB, soil within the project footprint area may contain pesticides and herbicides. Phase II investigation recommended.
- 9) The removal of traffic striping and pavement marking residue must be managed following a standardized LCP and WP prepared by a CIH to address the health and safety of workers performing the task. SSP 14-11.07 must be used whenever the project will include separate removal of yellow paint or yellow thermoplastic paint when the residue will be a hazardous waste (total lead equal to or greater than 1,000 mg/kg and soluble lead equal to or greater than 5 mg/l). If unsure, assume the paint residue will be a hazardous waste and use SSP 14-11.07. If you are sure (as a result of testing or complete painting records) that the yellow paint or yellow thermoplastic paint residue will be a non-hazardous waste, or if colors other than yellow are being removed, use SSP 15-2.02C(2) which only requires a lead compliance plan.
- 10) Lastly, this Phase I Report is not a compliance report or a permit evaluation. Additionally, no structural evaluation has been performed.

RECOMMENDATIONS

Based on the REC's identified in the conclusions, Cornerstone recommends the following:

- 1) Based on the potential for soil contamination at the southwest (Coyote Lot), the northeast (Former Plegel Lot), and the historical use of MVFS at the bridge, Cornerstone recommends conducting an initial Phase II environmental site investigation (SI) for both soil and groundwater contaminants that may be encountered in during excavations for the Golden Avenue Bridge Replacement Project. This investigation shall be conducted at the Plegel lot and the Coyote Lot. A Phase II is used to determine the presence, or absence of pollutants, contaminants, petroleum and petroleum products, or hazardous waste in the subsurface of the subject site. A Phase II should follow the guidelines set by the ASTM E1903-11 Standard Guide for Environmental Site Assessments

COCs at the project site to be tested for in the Phase II include: ADL, TPH (gasoline, diesel, and petroleum per 8015-Modified C4-C40), pesticides, Metals (Per EPA Test Method 6010) and for VOCs (Per EPA Test Method 8080).

ADL contaminated soil is defined as excavated soil whose only constituent of concern that poses an unacceptable risk to human health or the environment is lead, primarily from exhaust emissions from the operation of motor vehicles, in concentrations greater than considered appropriate for unrestricted use by DTSC (currently 80 milligrams per kilogram [mg/kg] total lead based on a 95 percent upper confidence limit [UCL]) and/or 5 mg/l extractable lead based on a 95 percent UCL, as determined by the CA Waste Extraction Test (CA-WET).

Clean soil is defined as soil not containing total lead over 80 mg/kg based on a 95 percent UCL or soluble lead over 5 mg/l based on a 95 percent UCL as determined by the CA-WET and not containing other constituents at levels that would pose an unacceptable risk to human health or the environment or be unacceptable to the Regional Water Quality Control Board with jurisdiction.

- 2) During the site reconnaissance for this project, Cornerstone observed markers at the Former Plegel Oil Facility in the northeast quadrant that suggests there is an active voluntary cleanup. This is verified by the Orange County Health Care Agency, Environmental Health Division, listing the site as “open” for industrial cleanup. A Soil Management Plan (SMP) will need to be prepared to provide procedures to guide soil management during excavation, confirmation sampling, and backfilling operations at the GAB. A Photo Ionized Detector (PID) will be used to determine any health safety issues relating to VOCs.
- 3) The GAB was constructed during a time when ACMs may have been utilized during the construction. (ISAs do not typically include ACM surveys) Cornerstone did not receive any information regarding the absence of ACMs. A comprehensive survey and sampling is recommended to confirm the presence or absence of ACMs prior to bridge removal or renovation. Any future testing, removal, or disturbance of ACMs should be handled in compliance with federal, state and local regulations. Licensed, qualified asbestos abatement personnel should be retained prior to any demolition or renovation of subject facilities.
- 4) Develop a work plan for LBP survey and sampling prior to bridge removal or renovation. Construction activities (including demolition) that disturb materials or paints containing any amount of lead are subject to certain requirements of the Cal/OSHA lead standard contained in Title 8, CCR, Section 1532.1. Deteriorated paint is defined by Title 17, CCR, Division 1, Chapter 8, §35022 as a surface coating that is cracking, chalking, flaking, chipping, peeling, non-intact, failed, or otherwise separated from a component. Demolition of a deteriorated LBP component would require waste characterization and appropriate disposal. Intact LBP on a component is currently accepted by most landfill facilities; however, contractors are responsible for segregating and characterizing waste streams prior to disposal. Potential hazards exist to workers who remove or cut through LBP coatings during demolition.

Dust containing hazardous concentrations of lead may be generated during scraping or cutting materials coated with lead-containing paint. Torching of these materials may produce lead oxide fumes. Therefore, air monitoring and/or respiratory protection may be required during the demolition of materials coated with LBP.

Guidelines regarding regulatory provisions for construction work where workers may be exposed to lead are presented in the Title 8, CCR, Section 1532.1.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

EXECUTIVE SUMMARY

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA generators list

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 12/12/2016 has revealed that there are 2 RCRA-SQG sites within approximately 0.25 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
MR DRY CLEAN	1069 E IMPERIAL HWY	NE 1/8 - 1/4 (0.136 mi.)	B5	16
<i>ELITE CLEANERS</i>	<i>1154 E IMPERIAL HWY</i>	<i>ENE 1/8 - 1/4 (0.169 mi.)</i>	<i>C7</i>	<i>18</i>

State- and tribal - equivalent CERCLIS

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 10/31/2016 has revealed that there are 5 ENVIROSTOR sites within approximately 1 mile of the target property.

State and tribal landfill and/or solid waste disposal site lists

SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Integrated Waste Management Board's Solid Waste Information System (SWIS) database.

A review of the SWF/LF list, as provided by EDR, has revealed that there is 1 SWF/LF site within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

State and tribal voluntary cleanup sites

VCP: Contains low threat level properties with either confirmed or unconfirmed releases and the project proponents have request that DTSC oversee investigation and/or cleanup activities and have agreed to provide coverage for DTSC's costs.

A review of the VCP list, as provided by EDR, and dated 10/31/2016 has revealed that there is 1 VCP site within approximately 0.5 miles of the target property.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Lists of Registered Storage Tanks

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there is 1 SWEEPS UST site within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 12/12/2016 has revealed that there are 2 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 12/05/2016	Source: EPA
Date Data Arrived at EDR: 01/05/2017	Telephone: N/A
Date Made Active in Reports: 02/03/2017	Last EDR Contact: 04/07/2017
Number of Days to Update: 29	Next Scheduled EDR Contact: 07/17/2017
	Data Release Frequency: Quarterly

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 12/05/2016	Source: EPA
Date Data Arrived at EDR: 01/05/2017	Telephone: N/A
Date Made Active in Reports: 02/03/2017	Last EDR Contact: 04/07/2017
Number of Days to Update: 29	Next Scheduled EDR Contact: 07/17/2017
	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991	Source: EPA
Date Data Arrived at EDR: 02/02/1994	Telephone: 202-564-4267

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 12/05/2016	Source: EPA
Date Data Arrived at EDR: 01/05/2017	Telephone: N/A
Date Made Active in Reports: 02/03/2017	Last EDR Contact: 04/07/2017

Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 11/07/2016	Source: Environmental Protection Agency
Date Data Arrived at EDR: 01/05/2017	Telephone: 703-603-8704
Date Made Active in Reports: 04/07/2017	Last EDR Contact: 04/07/2017
Number of Days to Update: 92	Next Scheduled EDR Contact: 07/17/2017
	Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 10/10/2016	Source: EPA
Date Data Arrived at EDR: 10/20/2016	Telephone: 800-424-9346
Date Made Active in Reports: 01/06/2017	Last EDR Contact: 03/02/2017
Number of Days to Update: 78	Next Scheduled EDR Contact: 05/01/2017
	Data Release Frequency: Quarterly

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 10/10/2016	Source: EPA
Date Data Arrived at EDR: 10/20/2016	Telephone: 800-424-9346
Date Made Active in Reports: 01/06/2017	Last EDR Contact: 03/02/2017
Number of Days to Update: 78	Next Scheduled EDR Contact: 05/01/2017
	Data Release Frequency: Quarterly

Federal RCRA CORRACTS facilities list

CORRACTS: Corrective Action Report

CORRACTS identifies hazardous waste handlers with RCRA corrective action activity.

Date of Government Version: 12/12/2016	Source: EPA
Date Data Arrived at EDR: 12/28/2016	Telephone: 800-424-9346
Date Made Active in Reports: 02/10/2017	Last EDR Contact: 03/02/2017

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 12/12/2016	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/28/2016	Telephone: (415) 495-8895
Date Made Active in Reports: 02/10/2017	Last EDR Contact: 03/02/2017
Number of Days to Update: 44	Next Scheduled EDR Contact: 04/10/2017

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 12/12/2016	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/28/2016	Telephone: (415) 495-8895
Date Made Active in Reports: 02/10/2017	Last EDR Contact: 03/02/2017

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 12/12/2016	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/28/2016	Telephone: (415) 495-8895

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 12/12/2016	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/28/2016	Telephone: (415) 495-8895

US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 11/15/2016	Source: Environmental Protection Agency
Date Data Arrived at EDR: 11/29/2016	Telephone: 703-603-0695
Date Made Active in Reports: 02/03/2017	Last EDR Contact: 02/28/2017
Number of Days to Update: 66	Next Scheduled EDR Contact: 06/12/2017
	Data Release Frequency: Varies

US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 11/15/2016	Source: Environmental Protection Agency

State- and tribal - equivalent CERCLIS

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Date of Government Version: 03/02/2017	Source: Environmental Protection Agency

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water board's review found that more than one-third of the region's active disposal pits are operating without permission.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 07/30/2013
Date Data Arrived at EDR: 08/19/2013
Date Made Active in Reports: 10/03/2013
Number of Days to Update: 45

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health
Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics
Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Source: National Center for Education Statistics
Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Licensed Facilities

Source: Department of Social Services
Telephone: 916-657-4041

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

GEOCHECK[®] - PHYSICAL SETTING SOURCE ADDENDUM

TARGET PROPERTY ADDRESS

1049 GOLDEN AVENUE
1049 GOLDEN AVENUE
PLACENTIA, CA 92870

TARGET PROPERTY COORDINATES

Latitude (North):	33.903932 - 33° 54' 14.16"
Longitude (West):	117.846035 - 117° 50' 45.73"
Universal Tranverse Mercator:	Zone 11
UTM X (Meters):	421779.8
UTM Y (Meters):	3751632.2
Elevation:	352 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	5640946 YORBA LINDA, CA
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

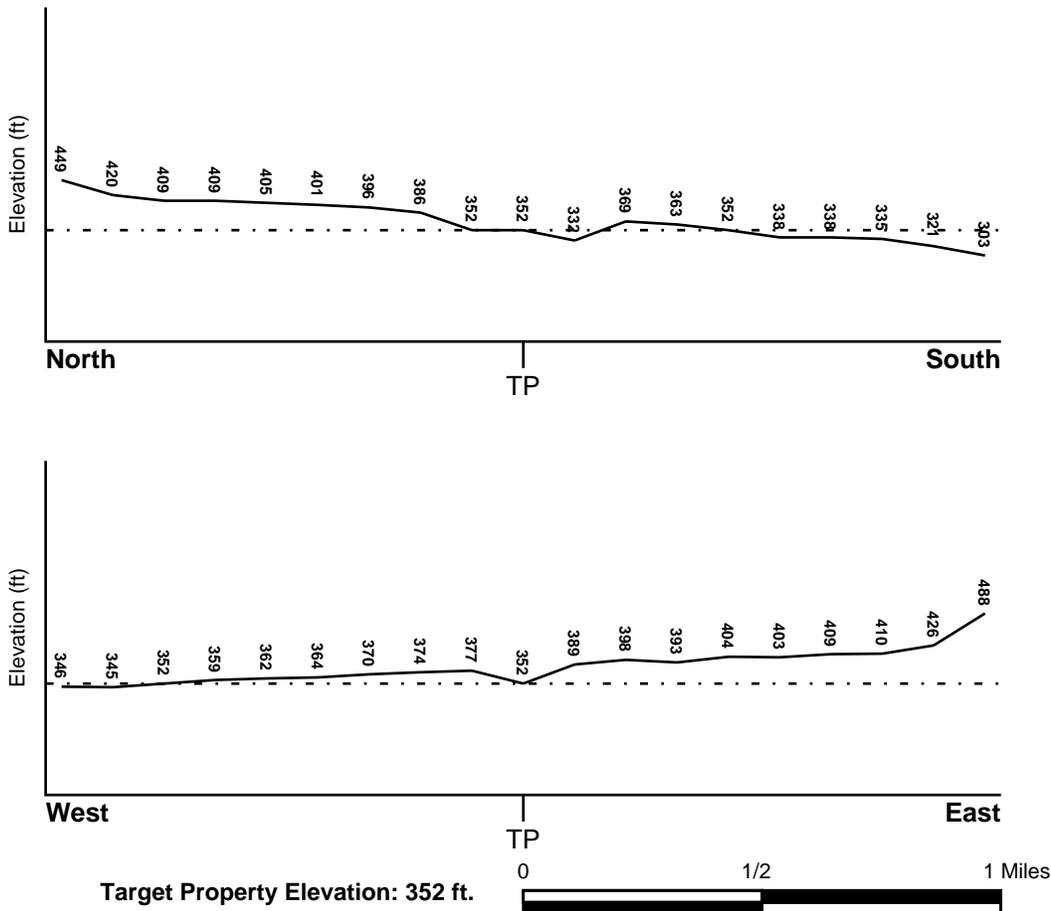

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>
06059C0063J	FEMA FIRM Flood data
<u>Additional Panels in search area:</u>	<u>FEMA Source Type</u>
06037C1900F	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
YORBA LINDA	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
A1	1/2 - 1 Mile ESE	Not Reported
A2	1/2 - 1 Mile ESE	Not Reported
3	1/2 - 1 Mile NW	SW

For additional site information, refer to Physical Setting Source Map Findings.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: RIVERWASH

Soil Surface Texture: sand

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class:
Hydric Status: All hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 31 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	5 inches	sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Clean Sands, Poorly graded sand.	Max: 141 Min: 42	Max: Min:
2	5 inches	59 inches	stratified coarse sand to sandy loam	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 141 Min: 42	Max: Min:

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Map ID: 2

Soil Component Name: MOCHO

Soil Surface Texture: loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	31 inches	loam	Not reported	Not reported	Max: 14 Min: 4	Max: 8.4 Min: 7.9
2	31 inches	61 inches	loam	Not reported	Not reported	Max: 14 Min: 4	Max: 8.4 Min: 7.9

Soil Map ID: 3

Soil Component Name: MYFORD

Soil Surface Texture: sandy loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Moderately well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory

Source: Department of Fish & Game

Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Water Well Database

Source: Department of Water Resources

Telephone: 916-651-9648

California Drinking Water Quality Database

Source: Department of Public Health

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

OTHER STATE DATABASE INFORMATION

California Oil and Gas Well Locations

Source: Department of Conservation

Telephone: 916-323-1779

Oil and Gas well locations in the state.

RADON

State Database: CA Radon

Source: Department of Health Services

Telephone: 916-324-2208

Radon Database for California

Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

Supplemental Attachments

Supplemental Documents

Note: Please use the above button for attaching additional documents that will help define your public records request.

INSTRUCTIONS FOR REQUESTING RECORDS

(California Public Records Act, Govt. Code Sections 6250-6276.48)

1. In order to expedite your request, please fill out the form completely. Requests may also be submitted by phone at (909) 396-3700, by facsimile to (909) 396-3330, or by email to PublicRecordsRequests@aqmd.gov.
2. Requests must be for records prepared, owned, used, or retained by the District (Gov. Code Sec. 6252(e)). Requests should be for clearly identifiable records. The District is not required to create a new record in response to a request. The District will assist the requestor in making a request that describes reasonably identifiable records (Gov. Code Sec. 6253.1). Documents will not be provided if disclosure would infringe upon a copyright, trade secret, or is otherwise exempt in accordance with state law.
3. A search for facility records can only be conducted by one or all of the following:
 - a) Facility Name, Address, or Identification Number
 - b) Facility Application Number, or Permit to Operate Number; or
 - c) Facility Notice of Violation/Notice to Comply Number.
4. You will be notified within ten (10) days whether your request seeks copies of disclosable public records prepared, owned, used, or retained by this agency. In some cases, the District may need an additional 14 days to respond. If so, you will be notified in writing. You will also be provided an estimated date of when the records will be made available.
5. Communications regarding your request, and any records, will be provided by email, unless specified otherwise.
6. If the search for records finds the records voluminous, you will be notified of the approximate number of pages and/or length of time it will take to process your request.
7. If the records you requested have been marked confidential by the source of the record, you will be notified and given the option of continuing with the District's Trade Secret process.
8. If your request is to review records, rather than receive copies, the District will notify you once the records are gathered, and arrangements will be made for your review.
9. The charge for the direct cost of duplication is as follows: Paper Copies, \$0.15/page each over 10 pages (first 10 pages are free); Copied CD's or flash drives, no charge; and Copied Audio Tapes, \$5.00 each. After a preliminary estimate, advance payment may be required.
10. If the request is for information in an electronic format, the requestor shall bear the cost of producing a copy of the record, including the cost to construct the record and the cost of programming and computer services necessary to produce a copy of the record, when either of the following applies: (1) the District would be required to produce a copy of an electronic record and the record is one that is produced only at otherwise regularly scheduled intervals, or (2) the request would require data compilation, extraction, or programming to produce the record. (Gov. Code Sec. 6253.9(b)). The transfer of gathered electronic records onto CD, DVD or flash drive typically costs \$10.00 each. An invoice will accompany your records when completed.

Note: For further information, please refer to the District's Guidelines for Implementing the California Public Records Act. The Guidelines are available in the lobby of the District Headquarters or on the District's web site at www.aqmd.gov.

Note: If you have questions pertaining to the submittal of a Public Records Act request, you may contact the Public Records Unit, (909) 396-3700, Tuesday through Friday, 7:00 a.m. to 5:30 p.m. Our Fax number is (909) 396-3330. Our email address is PublicRecordsRequests@aqmd.gov.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. A check mark indicates where information was identified in the source and provided in this report.

JOHN R. TALBOT, REAI, CISEC, QSP

Senior Environmental Project Manager

Educational Background:

- B.S. Biological Sciences, UC Irvine 1988
- B.A. Social Sciences, UC Irvine 1988

Past Work Experience:

- Associated Laboratories 1988-1992
- Harding Lawson and Associates 1992-1994
- Advanced Environmental Controls 1994-1998
- Cornerstone Technologies 1998-Present

Professional Certification/License/Registration:

- General Engineering Contractor, A, A-HAZ, Solar #749743
- Certified Inspector of Erosion and Erosion Control #1556
- SWRCB Qualified Stormwater Professional #25371
- Registered Environmental Assessor I, II, #04690, #2026

Summary of Experience:

Mr. Talbot is the founder and Principal Project Manager for Cornerstone Technologies Inc. (Cornerstone). He has been with Cornerstone since its inception in 1991. He has over 28 years of diverse technical experience in project management, planning, development, design, environmental impact investigations, land use rights and entitlements, permitting, agency negotiations, facility decommissioning and closure, new facility upgrades, storm water pollution prevention investigations, plans, reports and management, facility audits and assessments, infrastructure repair, underground installations, and new building planning and development. Mr. Talbot's specialty as a project manager is in managing principals, administrative staff, vendors, subcontractors, clients and agencies in fulfillment of the scope of services for each project in a timely manner with excellence and client needs always in mind.

Prior to founding Cornerstone, he worked for Advanced Environmental Controls, and Harding Lawson as a project manager. Mr. Talbot has been responsible for Cornerstone's repeat business over the years from large land development projects for developers, cities, attorneys, real estate and mortgage companies, banks, and international major manufacturing, chemical, energy and oil companies, and other Fortune 100 and 500 clients. As a consultant, Mr. Talbot represents the Wang Partnership of developers, one of the major land developers in Southern California of hotels, strip malls, restaurants, car washes, and other businesses. He has worked for such well known developers such as Kaufman & Broad, the Archdiocese of San Bernardino, Grubb & Ellis, Lee and Associates and cities in Southern California cleaning up Brownfields and redeveloping land for shopping centers, new facilities, colleges, schools, banks, and infrastructure developments. His specialty in permitting, agency negotiations, code compliance, plans to mitigate environmental issues with fast-track solutions, and wastewater solutions. Mr. Talbot has assisted companies in avoiding fines and potential litigation. In addition to this wide technical expertise, Mr. Talbot has managed projects and assisted with engineering analysis, industrial compliance and new facility upgrade installations.

Relevant Project Experience:

National Trails Highway Bridges, Victorville, CA

Project consultant for Phase I Environmental Site Assessment for thirty-three (33) bridges on Route 66, a National Trails Highway. Evaluated all potential environmental risks associated with right-of-way (ROW) and construction impacts. Developed conclusions to address aerially deposited lead (ADL), pipelines, utility relocated, creosote impacted materials, asbestos containing materials and lead based paint.

I-405 Lane Addition Project, Los Angeles, CA

Project consultant for ADL excavation, disposal and transportation. Developed health and safety plan (HASP) for ADL excavation project including air monitoring by Certified Industrial Hygienist (CIH). Performed additional work related to endangered species habitat protection.

Ducommun Aerostructures Hazardous Materials Response and Reconstruction, El Mirage, CA

Project consultant and engineer for chemical milling tank hazardous materials response. Project included hazardous materials removal, decontamination, permitting, tank assessment reporting, tank design and engineering, tank construction and final closure with the County of San Bernardino Fire Department.

XL Cleaners Drycleaner, Anaheim, CA

Project consultant for remediation of solvent impacted soils from historical drycleaner operations along Anaheim Blvd. Project part of City project for street widening and improvements. Performed expedited remediation utilizing vapor extraction and obtained closure through all concerned agencies including Anaheim CUPA and Regional Water Quality Control Board (RWQCB).

Montebello Transit, Bus Terminal, Montebello, CA

Site investigation and characterization of soil and groundwater contamination resulting from underground storage tank release. Developed site conceptual model and evaluated remedial alternative. Installed eleven (11) groundwater monitoring wells. Reporting to RWQCB – Los Angeles Region and final closure granted.

Superior Industries, Wheel Manufacturing, Van Nuys, CA

Site assessment, investigation, characterization and remediation of former plating facility. Performed soil excavation, profiling, disposal, backfill, recompaction and resurfacing for facility resale. Project involved evaluation of remedial target levels based on current EPA PRGs, CA CHHSLs and Hazardous Waste profiling guidelines. Work with California Fire Department Hazardous Materials Site Mitigation Unit and Department of Toxic Substances Control (DTSC).

Toyota Logistics USA, Port of Long Beach, CA

Removed three (3) 30,000 gallon underground fuel storage tanks, performing permitting, sampling, reporting, tank cleaning, excavation, tank removal, backfill, recompaction and resurfacing. Upon completion of removal effort, designed 100% aboveground fuel system comprised of three (3) 10,000 gallon gasoline aboveground storage tanks with Phase I and II vapor recovery system and eleven (11) dispensers. 1st 100% aboveground gasoline system in California.

BMW of North America, Vehicle Prep Facility, Oxnard, CA

Designed, permitted and installed aboveground fuel storage tank and dispenser at BMW emissions test center. Project required permitting for specialty fuels.

Foamex International, Foam Plan, Oxnard, CA

Performed facility closure and demolition of polyurethane foam manufacturing plant. Project required site specific health and safety plans for cleaning of manufacturing equipment and chemical storage tanks in preparation for demolition and scrap recovery. Performed industrial cleaning of process piping, excavation and removal of subsurface equipment and preparing the building ready for sale. Included roof, driveway, wall and electrical construction activities. Worked with all concerned agencies including Southern California Air Quality Management District (SCAQMD), RWQCB, Fire Department and CUPA.

NASA JPL, Pasadena, CA

Performed complete hazardous materials inventory assessment, quantity evaluations, regulatory compliance analysis and agency reporting. Included development of materials inventory in California Environmental Reporting System (CERS) database. Performed audits on behalf of NASA in compliance with Fire Department Directive.

Ryan Berlino

Environmental Project Manager

Educational Background:

- B.A. Environmental Science and Policy, Long Beach State 2012

Past Work Experience:

- Environmental Media Association 2012
- Cornerstone Technologies 2013-Present

Professional Certification/License/Registration:

- Certified 40 Hour HAZWOPER #161893

Summary of Experience:

Mr. Berlino is the newest associate of Cornerstone Technologies Inc. (Cornerstone) having been hired in 2013. As a consultant, Mr. Berlino has been responsible for communicating with regulatory agencies, environmental site assessments, permitting, developing storm water pollution prevention plans and spill prevention control plans, creating hazardous materials business plans, and assessing waste tank systems.

Mr. Berlino has assisted clients in regulatory compliance and consulted on technical issues which resulted in avoiding fees and or fines.

Relevant Project Experience:

National Trails Highway Bridges, Victorville, CA

Assisted Project Consultant for Phase I Environmental Site Assessment for thirty-three (33) bridges on Route 66, a National Trails Highway. Conducted Site Reconnaissance, evaluated potential environmental risks associated with right-of-way (ROW) and construction impacts.

Innovation Core SEI, San Marcos, CA

Project consultant for developing hazardous waste tank assessment, No Exposure Certification (NEC) with the Regional Water Quality Control Board (RWQCB), and 24 Hour Emergency Response Plan.

Shimadzu, Long Beach, CA

Completed Hazardous Materials Inventory Assessment and submission to the California Environmental Reporting System (CERS) database. Completed Tier 1 Permits and submitted NEC to RWCQB.

Sierra Building Products, Fontana, CA

Filed air permits with Air Quality Management District (AQMD), Developed and completed Storm Water Pollution Prevention Plan (SWPPP), Storm Water Exceedance Report and environmental site assessment. Consulted on best management practices for mitigating industrial parameters for storm water compliance.

National Technical Systems, Santa Clarita, CA

Developed and completed Spill Prevention Control Plan, SWPPP, Self-Monitoring Program, and Hazardous Materials Inventory Assessment.
